

FOR SAGE 200

Besyncly Integration →

SUBSCRIPTION

The Besyncly Integration Subscription increases efficiencies and visibility across key business areas by connecting Sage 200 to third party systems including ecommerce platforms, CRM platforms and more, sending data including orders, customers, sales and stock back and forth to a specification and schedule suited to your needs.

Eureka Addons included in the Besyncly Integration Subscription:

With Besyncly, Sage 200 users can eliminate errors and save time by automating the transfer of data between Sage 200 and ecommerce platforms including WooCommerce, eBay, Amazon, Magento, Visualsoft and BigCommerce. New connectors are being added all the time by our developers, so don't hesitate to enquire if the system you may wish to connect is not listed.

& BESYNCLY INTEGRATION

FEATURES BENEFITS

IMPORT AND EXPORT CUSTOMERS

Automatically transfer customers directly between Sage 200 or Standard and your other business systems, such as your ecommerce, ERP and CRM system, saving you time and eliminating manual errors.

IMPORT AND EXPORT SUPPLIERS

Automatically transfer suppliers between both Sage 200 and Standard to 3rd party systems to ensure consistency. This keeps your supplier accounts up to date allowing you to pay on time and receive the goods needed to send to your customers on time.

EXPORT STOCK LEVELS

Automatically update stock levels in your other business systems such as your ecommerce platform using data from Sage 200 or Standard. This will ensure you are never unable to deliver on a customer purchase and that your customers never see the dreaded 'out of stock' error message.

IMPORT AND EXPORT STOCK RECORDS

Automatically transfer your stock record information between Sage 200 and other business systems. This will allow you to ensure information like product descriptions and pricing are accurate at all times.

EXPORT PURCHASE TRANSACTIONS

Automatically transfer purchase transactions from Sage 200 and Standard to your other business systems.

IMPORT SUPPLIER AND NOMINAL TRANSACTIONS

Transfer supplier and nominal transactions to your Sage 200 system allowing you to maintain accuracy within your accounts.

IMPORT AND EXPORT PURCHASE ORDERS

Automatically transfer purchase orders between Sage 200 and systems like your ecommerce, ERP or CRM systems, improving your fulfilment process.

IMPORT SALES ORDERS

Import sales orders from systems such as WooCommerce, eBay, Shopify and many more into both Sage 200 and Standard.

EXPORT SALES ORDER DISPATCHES

Automatically transfer sales order dispatches from Sage 200 to your other business systems.

AND
MORE

“

As online sales grew, it was becoming quite time consuming to manually update sales orders and stock levels. Rebuilding our website gave us an opportunity to look at how we could automate this process. Eureka Solutions were able to offer us a solution where Besynclly automatically sends sales orders from our online shop to Sage 200, as well as updating stock levels at set intervals. Eureka Solutions were professional and helpful throughout in finding us a bespoke solution that worked for us.
