& FEATURES BENEFITS

CONNECT DIRECTLY TO COURIERS

Integrate Sage 200 with couriers including: **Royal Mail**, **DPD**, **Tuffnells**, **Asendia**, **NetDespatch** and **Parcelforce**, streamlining your shipping and distribution processes.

GENERATE SHIPPING LABELS

PDF shipping labels can be automatically created at the point of order, ready to print and attach to parcels, removing the need to manually create labels individually with customer details.

CREATE AND STORE TRACKING NUMBERS

Keep track of despatched items by retrieving courier tracking numbers automatically and recording them within Sage 200.

& FEATURES BENEFITS

SEAMLESS COLLECTION

Courier link is fully integrated with Sage 200 and your courier, ensuring the entire process from order to shipment is simple and efficient.

AUTOMATIC WEIGHT CONVERSION

The system can be configured to automatically convert parcel weights to suit different courier requirements.

CONFIGURE DELIVERY SERVICES BY COURIER

Additional menus are provided allowing users to configure individual courier settings and services, ensuring customers are charged accordingly.

AMEND PARCELS AND DIMENSIONS

Users have the functionality to view parcel details after orders have been raised, amending recorded parcels and their dimensions as required.

CUSTOMISABLE USER PERMISSIONS

Control access permissions per user, allowing only authorised staff to amend recorded parcels and modify dimensions.

ENHANCED VISIBILITY OF SHIPMENTS

When viewing despatches on a sales order, users are given enhanced options to view or amend the parcels linked to the despatch. This also gives users additional information including delivery service and tracking number.
