

AFD LOOKUP & VALIDATE

for Sage 200 Professional

Save time, reduce manual errors, and maintain a clean customer or prospect address database with our AFD Lookup and Validate Sage 200 addon.

By partnering with AFD The Postcode People, our Sage 200 Development Team have created an addon to remove clunky verification processes and give you full confidence in your data. The AFD Lookup and Validate addon inserts address, bank and contact data validation provided by AFD software straight into your Sage 200 solution.

BENEFITS

AFD provide solutions that deliver high-quality name, address, and bank data validation across a wide variety of business sectors. Utilising this powerful software within our addon offers the following functionality within Sage 200:

- > Search and validate addresses.
- > Validate emails.
- > Validate landline and mobile numbers.
- > Verify Banks

BENEFITS

- 🕒 Save Time and Money
- 📁 Improve Contact/Customer Data Accuracy
- 🖨️ Reduce Manual Data Entry
- ⚠️ Remove Processing Errors

& FEATURES

ADDRESS LOOKUP

With a 'Find Address' button added next to the Postcode fields in Sage 200 you can enter a full or partial postcode and auto populate the address fields with your selection.

BANK VALIDATION

With a new validate button next to the Bank Account Number field in Sage 200, users can enter a sort code and account number and have this instantly verified.

EMAIL VALIDATION

Email addresses entered in Sage 200 can now be validated by selecting the additional "Validate Email" button.

PHONE NUMBER VALIDATION

Immediately validate a contact number in the telephone field this by selecting the "Validate Telephone Number" button.

THE FUNCTIONALITY WILL BE AVAILABLE WITHIN THE FOLLOW SAGE 200 SCREENS:

The functionality should be added onto the following screens: customer details, customer delivery addresses, supplier details, bank accounts, warehouses, purchase orders, purchase returns, sales orders, sales returns, quotes and pro-formas.

"For us, the biggest driver was the time saved by not having to key in data manually. On average we would make between 4 and 7 address checks on any new case, taking between 2 and 3 minutes to enter all the address data per case. On average we receive 2000 cases per month. That translates to a saving of between 4,000 and 6,000 minutes, 66 and 100 hours each month!"
